Claim Objections

1. Claim 6 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to claims in the alternative form. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.
2. Claims 7, 9-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The limitations of claim 1 are not understood because of the usage of the word "same" in line 9.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 4, 5, 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by McBride. With respect to claims 1 and 19-21, McBride discloses a calling station that is connected to a voice codec. The digitized signal is passed to a CPU that processes signals from the handset via the codec. The CPU interfaces with a PSTN interface as well as a packet interface (see Figure 2 and column 2, line 63 – column 3, line 9). With regard to claim 4, it is inherent that the CPU includes a storing means. With respect to claim 5, McBride discloses a keypad on the calling station (see figure 2).

Allowable Subject Matter

7. Claims 2, 3, 8, 22-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
